

Part L Compliant - Made Easy **With NTSROOF**[®]

Our NTSROOF[®] panelised system is designed to help homes comply with 2021 Part L Building Regulations and move towards the Future Homes Standard requirements.

NTSROOF, the original gable-to-gable system. The construction is manufactured without the need for steel and is able to span over 9m.

NTSROOF's 195mm joist depth can give a panel U value of 0.015 W/m²K, with industry-leading Psi values due to the unique NTSROOF dwarf wall details.

NTSROOF is tailored to meet your design, structural and compliance requirements, from the inclusion of uninsulated sections to fully insulated solutions.

Talk to our NTSROOF team if you need a Simple and Safe solution that is Secure in its design and compliance.

KEY BENEFITS

- + On-site construction time and labour costs are reduced
- + 4 roofs can be installed in 1 day due to its simple but innovative design
- + Factory fabrication improves dimensional accuracy
- + High panel insulation values
- + Industry leading Psi values
- + Robust Details approved
- + We have the capacity to design, fabricate & deliver thousands of roofs per year.
- + NTSROOF the Simple Safe Secure Solution
- + NTSROOF system = less on site
