Website: www.nationaltimbersystems.co.uk

The logo features a stylized orange roof gable above the text 'SUPER-SPAN®' in black. Below this, 'NTSROOF®' is written in a large, bold font, with 'NTS' in black and 'ROOF' in orange.

NTSROOF® SUPER-SPAN® creates more space, faster, and is perfect for large detached homes and dormer bungalows.

Starting with the dwarf walls and a 4-cassette system, our 9+ metre-wide SUPER-SPAN roofs can be constructed in a single day.

The all-timber roof construction eliminates the need for structural internal walls, steels and purlins. The unique load spreading design gives flexibility in the positioning of lintels, windows and other details.

SUPER-SPAN® is based on the tried and tested NTSROOF® system which has been in production since 2015, and is designed to be Simple, Safe, Secure.

Key Benefits

- + 9+ metre single span
- + No steels or padstones, helping to reduce embodied carbon in the building
- + Unique click and fix solution makes installation simple
- + A system with just 4 cassettes and 2 panels
- + 3 hour install time
- + Robust Detail Compliant
- + Improves Psi and U values
- + When delivered as an NTSROOM™ the whole room installation can be completed in a day, floors and all.

NTSROOF® Range products are designed, fabricated and delivered across the UK from our strategically located sites in England. Our customers include national housebuilders, local contractors and developers.

“By far the most efficient system on the market, and we’ve seen them all! So easy to fit.”

“The call-off process is very professional and when you say you deliver it happens - no excuses!”

“Your technical pack and safe systems of working are very impressive.”

“Fantastic product, very-well designed and a slick system. Excellent customer service.”

“Manufacture the finest panelised roof system I have ever erected. The level of assistance when we first started was absolutely fantastic. All fixings, drawings and fixing schedules were supplied with the delivery and extremely easy to read.”
